

ROMA ORAL HISTORY PROJECT

Do you feel that Roma people still experience a lot of discrimination?

Do you want the future generation of Roma people to know more about Roma history and culture?

If yes and you feel strongly about this, come and tell your story.

One of the main issues with the Roma community is that their history has often been 'hidden' and written out of mainstream history, and this has resulted not only in gross misconception, but also in an increasing number of young Roma people being ashamed to say they're Roma.

This Project can give you the unique chance to speak up and tell your story and define your own narrative and history. Only by doing this we can promote greater cultural awareness and understanding, challenge negative stereotypes and change how young Roma people see themselves and their heritage.

If you want to be involved and know more, please speak to Szymon, Klarysa or Tania (07905859012).
